Audiovisual Equipment Instructions

Media & Technology Support Services

This system is operated with the Touch Screen controller on top of the desk

1) To turn the system on, touch the screen.

2) You will be asked if you want to use Presentation Mode (Large Screen Only), SmartBoard, or Both.

3) Once you select a mode, the system will warm up and you will see a list of sources on the touch screen. Touch the button and the corresponding source will be sent to the display(s) and the speakers.

4) You may connect your laptop to the system using the supplied HDMI or VGA+Audio cable.

5) This system has an AppleTV installed in it. You may use it to connect your iOS or Mac device to the system using AirPlay. Select the AppleTV source on the touch screen, make sure your device has WiFi and Bluetooth enabled, and follow the instructions that appear on the projector to connect.
