

How do I use the Elmo USB document camera with my computer?

The Elmo OX-1 document camera is easy to use, lightweight USB tool for teaching. The OX-1 offers 8x digital zoom via software and comes with a built-in microphone. You can use it with any computer and any web-conferencing tool for online dissemination of the content in real-time. Below are the steps on how to use and connect the OX-1 external document camera with your computer.

Getting Started

Here is a summary:

1. Raise the camera head as indicated by the rightward pointing arrow and while holding down the base.
2. Raise the upper arm in an upward direction as indicated by the upward pointing arrow next to STEP2.
3. Set the camera head horizontally.
4. Rotate the camera angle to your desired angle.

5. Connect the camera to your computer using the provided USB cable.

6. Connect the type B connector of the supplied USB2.0 cable to USB connector in the side of the product.
7. Connect the type A connector of the USB2.0 cable to the USB port of your running computer.

Using the Document Camera for Online Teaching/Presenting

The Elmo OX-1 document camera can be used to connect to conferencing software like Zoom, Google Meets or other similar software.

Zoom

1. Launch the Zoom meeting
 2. Press the Share Screen button
 3. Click the Advanced tab and select "Content from 2nd Camera
- Additionally, the OX-1 has a built-in microphone that can also be used with conferencing software.
